

Part B: Subject specific skills Ch-2 Data Entry and Keyboarding Skills Unsolved exercise

Section - B

A. Short Q/Ans

1. If no error while character typing, will it be shown in the error exercise?

Ans:- No

2. How many default courses are available in Rapid Typing software?

Ans:- (i) Introduction

(ii) Beginner

(iii) Experienced

(iv) Advanced

(v) Testing

3. What is the use of the Options present on the Title bar?

Ans:- Options are present on the right side of the title bar which contains options like language, background, text colour, themes, shortcut keys, layouts, etc, which can be customised.

4. What is the use of the virtual keyboard?

Ans:- Virtual keyboard is placed just below the status bar and helps you learn typing using the touch typing method, by using all the ten fingers.

5. How does the result window show your performance in the current lesson?

Ans:- The result window shows your performance in the current lesson in terms of :-

- (i) Overall rating
- (ii) Speed
- (iii) Accuracy
- (iv) Slow down

B. long Q/Ans

1. Differentiate between Num Lock Key and Caps Lock Key.

Ans:- Caps Lock

Num Lock

It works as a toggle key to switch between the capital letters or small letters at the time of giving an input to the computer.

It is present on the top-left corner of a keyboard's numeric keypad. It toggles the use of numbers on the numeric keypad. If it is ON, then the numbers can be used as basic calculator or

If the Caps Lock Key is ON, then capital letters are printed and if it is OFF, then small letters are printed.

otherwise, the alternate functions of the keys are performed.

2. What are the functions of the Enter Key?

Ans :- There are two ^Enter ^Key keys on the PC keyboard and laptop keyboard; one is above the right shift key and the other on the bottom right of the numeric keypad. Some of the important functions performed by the Enter Key are:-

- (1.) Send a cursor to a new line.
- (2.) Create a blank line.
- (3.) Start a new paragraph.
- (4.) Submit a new form.
- (5.) Activate a selected option.
- (6.) Complete a process like open a URL entered in the address bar of a browser window.

3. Explain the factors of Typing Ergonomics.

Ans:- * Sitting posture

- (i) While operating the computer keyboard, the neck and the back should be relaxed and straight.
- (ii) Check your comfort, and sitting position of body.
- (iii) Touch the lower portion of your back, to the lower portion of the backrest of the chair.

* Position of hands

- (i) Put your forearms at level with the keyboard and palms down.
- (ii) Keep your wrists straight and hang your elbows naturally.
- (iii) Don't touch the elbows to the body, nor be too far away from the body.

* Monitor placement

- (i) Do not bend your neck while working on the monitor and keep the upper border of the screen at eye level.

(ii) The distance of the screen from the user depends on the size of the screen. Keep an approximate distance of about 60-65 cms for a 17 inches screen.

(iii) Monitor should be placed at arm's length distance, or 20 to 30 inches away.

* Mouse and Keyboard Placement

(i) Keep the keyboard and mouse together at an approximate distance of 20 cm, which will help in smooth and effortless operation of the keyboard.

(ii) Same height of keyboard, mouse, and elbows help the users to work comfortably.

* Chair and Table Placement

(i) Adjust the computer chair and table to an optimal height.

(ii) The chair of the computer user must be supportive to his/her lower back.

(iii) Keyboard and vibrating devices, such as printers, should be on separate tables.

* Placement of matter to be typed

(i) Place the matter for typing to the left or

right side of the keyboard, preferably on a copy holder which has a sloping surface.

4. Explain the concept of ~~A~~ Allocation of Keys to fingers on various rows.

Ans:- The left-hand finger's base position will be:

- (i) Key A - Left hand's little finger
- (ii) Key S - Left hand's ring finger
- (iii) Key D - Left hand's middle finger
- (iv) Key F - Left hand's index finger

The right-hand finger's base position will be:

- (i) Key ; - Right hand's little finger
- (ii) Key L - Right hand's ring finger
- (iii) Key K - Right hand's middle finger
- (iv) Key J - Right hand's index finger

5. What are the four main components of the Statistics panel in Student Statistics?

Ans:- Statistics panel consists of four components:

Statistics Toolbar:- It has buttons for selecting courses, removing selected statistics

and customising the statistics display options

Course Diagram / Statistics :- This shows the common statistics of all the lessons, of the current course.

Lesson Diagrams / statistics :- This shows the complete statistics of each character of the selected lesson in the course diagram.

Lesson statistics Table :- This shows the statistics of the selected lesson in the course diagram.

6. Explain the following with an example :

- WPM
- CPM
- KPM

Ans:-

In terms of	Typing speed	
	Gross speed	Net speed
Words	$\text{WPM} = \frac{\text{words without errors} + \text{words with errors}}{\text{time spent in minutes}}$	$\text{Net WPM} = \frac{\text{WPM} - (\text{words with errors} / \text{Time spent in minutes})}{1}$

Typing speed		
In terms of	Gross speed	Net speed
Characters	$CPM = \frac{(\text{characters without errors} + \text{characters with errors})}{\text{Time spent in minutes}}$	$\text{Net CPM} = CPM - \frac{(\text{characters with errors})}{\text{Time spent in minutes}}$
Keystrokes	$KPM = \frac{(\text{keystrokes without errors} + \text{keystrokes with errors})}{\text{Time spent in minutes}}$	$\text{Net KPM} = KPM - \frac{(\text{keystrokes with errors})}{\text{Time spent in minutes}}$

7. Write the steps to download Rapid Typing Software.

Ans:- Step I - Select WTN for windows keyboard or MAC for mac keyboard.

Step II - select the keyboard type from list as desktop.

Step III - select the layout type as 104 key (standard layout).

Step IV - choose enter key : flat and numeric pad type (say 1), that match with your physical keyboard.

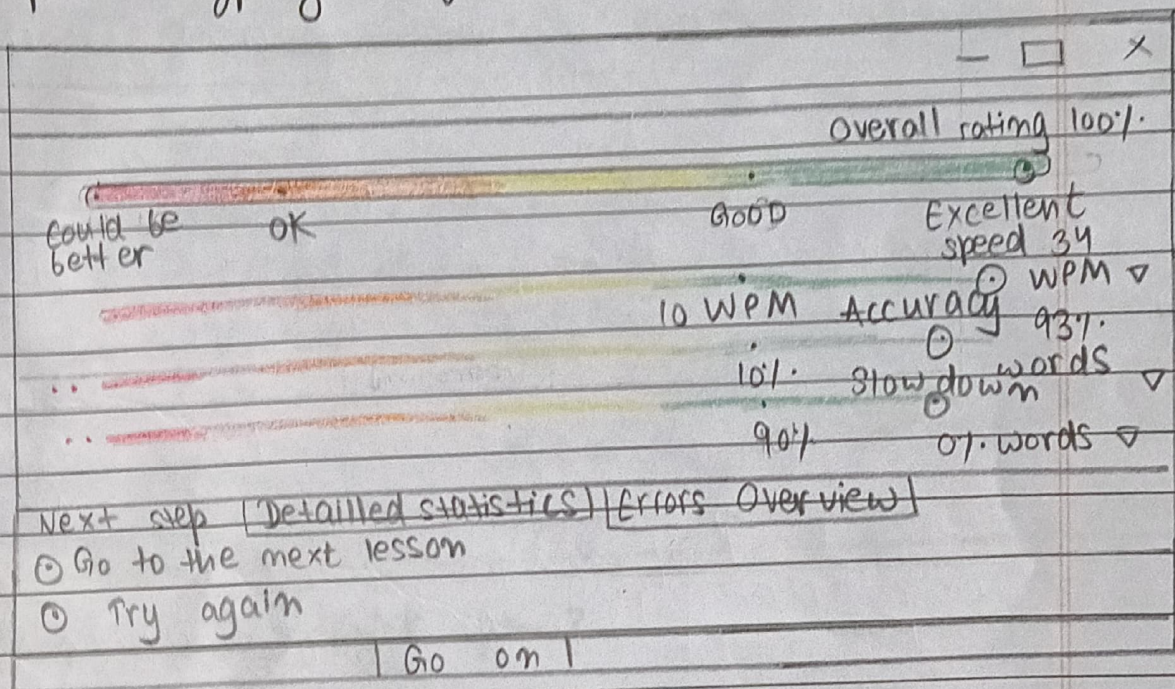

Step V - choose the scheme of fingers position as two hands.

Step VI - change the scheme colours in case you want.

Step VII - click on OK to complete the configuration setting wizard.

8. How do we interpret the result in the Rapid Typing software?

Ans:-

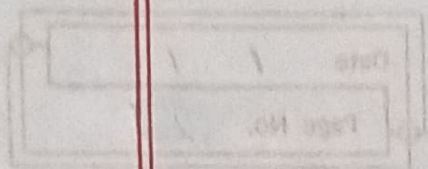

Green colour in the line shows good results.

Yellow colour shows the time frame exceeded by you.

Red colour in the line shows bad results.

Orange colour shows an incorrect character typed, and time frame for typing correct.

character exceeded by you.
